

Usability Test

Tester: _____

Challenge when you go to a medical appointment.

5 of 10 testers said they wanted more information ofnwhat to do after their appointments..

Task to perform:

View progress report.

- Want access to progress report as soon as they tap progress
- Simplify the categories in progress report
- Have an overview of everything that you can break down into categories

See therapies you have taken.

- Don't see the difference between sort and filter
- Prefer therapies ordered by date
- Will like to see total of therapies required

Find Recovery 1 Program.

- Add ability to see plan when I want to do it
- Add clear identification of how to see progress from this screen

Record yourself while in playlist.

- Record in the moment patient feels of discomfort
- Change placement of record button
- Suggestion: Record the whole thing and then chose what to send.

Ask a question with video.

- Chose sender first and then compose message
- Clarify if you can chose multiple senders
- Add video icon

Search an exercise.

- Add the ability to search doctors, programs, and exercise.

Observations on:

Iconography Prefer the TO DO icon in tab bar	Ability to go back Most used the back button at the top
Buttons Overview button was redundant	Clarity People who had never been to therapy didn't know difference between programs and therapy.

Additional Notes:

- Ability to learn more about your conditions. Educate the patient of their conditions and alternative things to faster recovery.
- Want to see notes put in by therapist on the therapy detail screen.
- Check how important the search section is.
